

EMIRTAES BOATS

63ft

Experience Luxury on the Water with the EB-63.

The EB-63 is the ultimate boating experience, with its sleek design and 6 Mercury V8 500R Engines. This exceptional vessel is equipped to handle any adventure on the water. Relax in the plush seating, enjoy the state-of-the-art entertainment systems, and store your gear in the ample storage space. Whether you're new to boating or a seasoned sailor, the EB-63 is an unforgettable way to experience the water.

WELCOME

With its sleek design and powerful engines, the EB-63 is the perfect vessel for those seeking an unforgettable boating experience. Whether you're looking to cruise along the coastline or head out into open waters, this top of the line boat is equipped to handle any adventure you can dream up.

But it's not just the EB-63's performance that sets it apart. The luxurious interior boasts plush seating, state-of-the-art entertainment systems, and all of the amenities you could possibly need for a day on the water. And with ample storage space for all of your gear, you can rest assured that everything you need is within reach.

So why settle for an average boating experience when you can take to the water in the EB-63? Whether you're an experienced boater or just starting out, this exceptional vessel is sure to exceed all of your expectations and leave you with memories that will last a lifetime.

MERCURY 500R V8

This powerful boat is truly a force to be reckoned with. The 6 Mercury 500R V8 Super Charged racing engines provide an incredible amount of power, allowing the boat to reach top speeds that will leave other vessels in its wake. With each engine expertly crafted to provide maximum performance and efficiency, this speedboat is truly a marvel of engineering. Whether you're racing against other boats or simply cruising along the water, the Mercury 500R V8 Super Charged engines ensure that you'll always be at the head of the pack.

So buckle up, hold on tight, and get ready for the ride of your life!

CARBON FIBER

Vinyl ester infused hybrid is a type of composite material that is made up of both carbon and E glass multidirectional fibers, as well as core reinforcement. This material is known for its high strength and durability, making it a popular choice in various industries such as aerospace, marine, and automotive.

The vinyl ester resin used in this material provides excellent corrosion resistance, making it ideal for use in harsh environments. The combination of carbon and E glass fibers provides a balance of stiffness and toughness, making it suitable for high-performance applications.

The core reinforcement in vinyl ester infused hybrid provides additional strength and structural support, making it highly resistant to impact and damage. This material can be used in a variety of applications, including structural components, piping, and tanks.

Overall, vinyl ester infused hybrid is a reliable and versatile material that offers exceptional strength and durability. Its unique combination of carbon and E glass fibers, along with core reinforcement, make it an excellent choice for a wide range of applications in various industries.

C-ZONE DIGITAL SWITCHING

The Fully Integrated C-Zone Digital Switching System is a state-of-the-art technology that offers advanced control options for marine vessels. With this system, boat owners can easily manage and monitor all aspects of their vessel's electrical system, from lighting and climate control to navigation and entertainment systems. The C-Zone system is designed to streamline vessel management, providing a single interface for controlling all onboard systems. This not only makes it easier to operate the vessel but also helps to improve safety, as the system can alert users to any potential issues or hazards. Whether you're a seasoned mariner or just starting out, the C-Zone Digital Switching System can help you enjoy your time on the water to the fullest.

ENTERTAINMENT SYSTEM

Unleash a New Level of Entertainment with Our State-of-the-Art Boat Entertainment System

Experience the ultimate in modern technology with our cutting-edge boat entertainment system. Boasting a 65 inch Samsung Smart TV, you can indulge in your favorite movies, TV shows, and sports games in stunning high definition. Plus, thanks to the satellite receiver, you have access to various channels and programming from across the world.

However, what sets our entertainment system apart is the exceptional JL Audio sound system. With 16 speakers and 4 subwoofers, you can immerse yourself in the ultimate sound experience. The clarity and depth of the sound will transport you to a whole new level of entertainment.

Whether you're hosting a movie night, gaming tournament or just enjoying a quiet night in, our entertainment system will provide an incomparable audio-visual experience. So sit back, relax, and let our state-of-the-art technology take you on a journey of sight and sound.

WORK STATION

An efficient and functional boat work station is a necessary component of any well-equipped boat. It serves as a practical workspace for preparing meals, cleaning dishes, and storing equipment. Typically, the station comes equipped with an induction stove, utilizing electromagnetic energy to heat pots and pans quickly and efficiently. Additionally, a grill is a popular feature, enabling boaters to cook up their catch of the day or prepare some classic favorites like burgers and hot dogs. The station is incomplete without a sink, which allows for easy cleanup and dishwashing. Above all, storage is a critical consideration, as a well-organized and clutter-free workspace is essential for safety and convenience while on the water. Regardless of your level of expertise, whether an experienced sailor or weekend boater, a boat work station is a must-have for any vessel.

NIGHT VISION CAMERA

This camera is an essential tool for boaters who frequently sail at night or in low-light conditions. With its advanced thermal imaging technology, it can detect heat signatures and display them as clear images on the boat's screen. This means that boaters can easily spot hazards such as other boats, buoys, or even wildlife that may be difficult to see with the naked eye. Additionally, the camera's high-quality optics allow for crisp and clear images, making it easier for boaters to navigate in challenging conditions. Whether you're a seasoned sailor or a novice boater, a top-of-the-line FLIR thermal night vision camera can provide you with the added safety and security you need when out on the water.
